WORK HISTORY

Asmita - Volunteer, App Development Team
01/2024 - 03/2024

- App Development for Fest
- - Collaborated with a team to develop an app used by over 2,500 students from 23 colleges, providing real-time score updates and event notifications
- Real Time Updates
- - Integrated real-time score tracking and event updates to keep users informed throughout the fest
- Data Management
- - Implemented functionality to store and retrieve previous scores, allowing users to access historical data during the event

PROJECTS

Stacked WebView, https://pub.dev/packages/stacked_webview,

Created a Flutter Package and uploaded it on pub.dev. A Flutter package that provides a WebView with custom back navigation, managed via a stack of URLs.

ChessMania, <https://github.com/aashray374/chess>,

Implemented Chess game in flutter from scratch without using any external dependencies.

Safar, <https://github.com/aashray374/safar>,

Safar is a Trip Planner App made with flutter which helps collaborating friends for a Trip and share post trip memories. Users can collaboratively maintain a packing list for their trip, search for nearby restaurants and hotels within 15 km, and receive recommendations for places to visit within 100 km. They can view these details on a map, check the weather forecast, and export trip details as a PDF to share. Additionally, users can share post-trip photos with each other and chat during trip planning.
